

- **100% brand new and high quality**
- Path tracing sensors, robots make necessary
- Using infrared light detection, anti-interference ability
- Sensor CTRT5000, high sensitivity, stable performance
- Operating voltage 5V, output low black line, white line output high
- Exquisite workmanship, with indicator
- A fixing bolt holes for easy installation
- Work Power : 5V DC
- Detector distance:10MM
- Applicable to a variety of platforms including Arduino / AVR / ARM /PIC
- Size:(L*W*H)4.22*0.90*1.25cm/1.66"*0.35"*0.49"
